

FAASTeam presents:

Maintaining Aging General Aviation Aircraft

The General Aviation Fleet of 150,000+ aircraft average age is more than 50 years old. The fleet is being used well beyond the flight hours and years envisioned when the aircraft were designed.

This presentation covers inspection/maintenance guidance on older aircraft for owners of older, small single engine airplanes and the technicians who maintain them. We will offer helpful tips for assessing the effects of aging on their airplanes.

Directions: You are invited to the following ZoomGov Webinar provided by FAVES. Optional ways to join are:
Click to Register:
