

Pilot and CFI Forum - ADS-B Essentials plus FAASTeam Topic of the Month

Join CFII John Moloney as he pulls back the veil on ADS-B. He'll cover the benefits and lesser-known features of the system, rules and regulations for Light Sport, Experimental, and certified aircraft, and practical applications in today's airspace environment. Learn techniques for viewing long-range weather, planning cross-country flights, and making the most of ADS-B tools.

This interactive forum is designed for local pilots, CFIs, and aviation enthusiasts. In addition to ADS-B insights, we'll collaborate on recent safety trends, pilot deviations, and operational lessons learned, while reviewing the current FAASTeam Topic of the Month.

Network with your peers, gain valuable safety tips, and strengthen our aviation community.
WINGS credit available. Refreshments provided.
