FAASTeam EA68 presents:

Winter Flying - Ice Does Not Care How Experienced You Are

Winter flying presents unique challenges, and experience alone does not eliminate the risks associated with aircraft icing. Join us for a discussion of winter weather hazards, recognizing conditions conducive to icing, and making sound aeronautical decisions. This seminar will emphasize practical risk management, effective preflight planning, and understanding when changing conditions warrant delaying, diverting, or canceling a flight.

This is a great opportunity to network, share insights, and support a strong local safety culture. **WINGS credit available.**

From Perth Road, turn onto Catawba Air Road; make first left into Lake Norman Airpark and proceed to 149 Yeager Road. The FBO is the last blue building on the left. Enter the lobby for Race City Flight Ops and take a left and follow the signs to the large UPSTAIRS classroom.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to https://www.wingsindustry.com/WINGS-Sweepstakes for more info. Join us
