FAASTeam presents:

The Aviation Trifecta - Fuel Weather CFIT

Join the Western North Carolina Pilots Association for a safety discussion addressing three important areas of flight operations: weather, fuel management, and controlled flight into terrain (CFIT). This seminar will emphasize effective weather briefings, recognizing factors that contribute to fuel-related incidents, and maintaining terrain awareness. Pilots are encouraged to attend and review practical risk management considerations that can help improve preflight planning and aeronautical decision-making.

From I-26, take Exit 40 toward Asheville Regional Airport. Travel south on Airport Road (NC 280) and turn into the airport at the green "Learn to Fly Here" sign. Continue to the stop sign. The Lacy Griffin Building will be directly ahead. Additional parking is available in the gravel lot to the left of the stop sign.

A message from the National FAASTeam Manager
