Telex Communications Sponsors 2005 Aviation Safety Seminar

Minneapolis, MN. – Telex Communications, who has manufactured aviation headsets for more than 50 years, has agreed to be the primary sponsor for the 2005 Aviation Safety Seminars to be held this March in the Chicago and Minneapolis areas.

SportAerobatics Marketing Group, who hosts and organizes the events, plan to continue with it's original format using Rich Stowell as the main speaker due primarily to the financial commitments from Telex and several other sponsors.

“Rich Stowell gives a fantastic presentation that includes a few stories, some humor and a complete multi-visual program.” Says Seminar founder and Aerobatic Pilot Michael Wiskus. “ Rich communicates well his experience and knowledge regarding all axis flying including stalls and spin characteristics. Bottom line is, this seminar saves lives.”

Wiskus's Safety Seminars began in 2002 and have grown in attendance to include more than 600 pilots, enthusiasts and venders. Chicago has been chosen to be the next location added to the seminar list. “It's helps to have the FAA as a partner.” Says Wiskus. “They've been a great help and are pleased with the results. They have even made these seminars part of their Wings accredited Programs which is a great benefit to each pilot”.

Two lectures, as well as the coffee and bagels are free to the public and include fifteen to twenty five aviation related booths and more than \$3,000.00 worth of door prizes. This half-day event begins with an 8:00am. registration and will end around 12:30pm. Aviation booths area will close at 2:00pm.
