
TAKEOFFS, LANDINGS AND AIRCRAFT CONTROL

This list contains information about the individuals, companies and originations that were involved in this programs development and testing.

Photo: Foundation Surgery Affiliates (FSA)

FSA was the primary supporter of the development and testing of this pilot clinic tool. Their facility at Wiley Post Airport in Bethany, OK was made available for months for all preplanning meetings, and our first clinic held on August 11, 2007. The clinic educated over 200 pilots while proving its worth. FSA provided air-conditioned facilities, food and drinks for all that attended. Thank You FSA.
