

# ADM & the 5 Ps Review

## Aeronautical Decision Making (ADM)

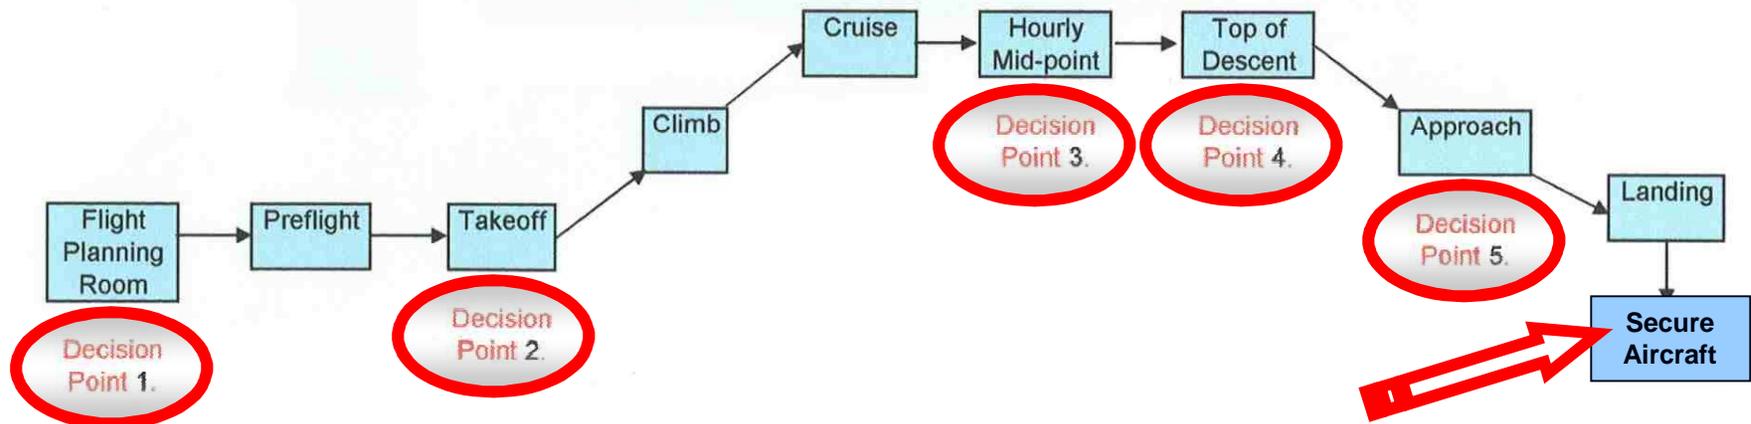

1. Task management ( TM )
2. Automation management ( AM )
3. Risk management ( RM ) & Aeronautical decision making ( ADM )
4. Situational awareness ( SA )
5. Controlled flight into terrain awareness ( CFIT )

## SRM 5p Check:

1. The Plan (Task, Wx, Route, Notams)
2. The Plane (Mx, Wt. & Bal., Perf, Preflight)
3. The Pilot (IMSAFE)
4. The Passengers (Pilot, non-pilot, schedule, nervous)
5. The Programming (GPS, flight computer, radio(s))

## Decision Points (DP):

1. Before leaving the planning room.
2. Before leaving the ground.
3. Hourly SRM updates (or mid-point enroute).
4. Before leaving cruise altitude.
5. Before leaving the initial approach fix.
