

ADS-B Traffic and Weather is Highly Beneficial And More Affordable Than You May Think!

DuPage Pilots Association hosts a joint seminar on ADS-B presented by Peter Ring of FreeFlight and Jeremy Sells of Rochelle Avionics. The deadline for installation of ADS-B is the end of 2019. FreeFlight Systems (The FAA awarded FreeFlight the contract for Alaska and they have been making radar altimeters for years) has several solutions including a complete certified system on sale until year end that can even output Free Traffic and Weather to an iPad wireless. No need to install a new WAAS GPS or new transponder. The RANGR 978 transceiver provides ADS-B IN and OUT and WAAS GPS position. Improve safety and comfort level now.

Directions: Head to DPA Tower, go to Flight Center conference room.

A message from the National FAAS Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
