

DuPage FSDO FAAS Team presents:

# **New FAA Safety Alert issued for Slow Flight and Stalls Standards**

Loss of control in flight continues to be the leading cause of fatal general aviation accidents in the United States and commercial aviation worldwide. As a result, the prevention of loss of control in flight in general aviation has been retained on the National Transportation Safety Board's (NTSB) Most Wanted List of Safety Improvements for 2017. With the release of the Private Pilot – Airplane ACS in June 2016, the Federal Aviation Administration (FAA) revised the slow flight evaluation standard to reflect maneuvering without a stall warning (e.g., aircraft buffet, stall horn, etc.).

Download the attached Safety Alert for Operators 160101 - and bring it with you. We will discuss how best to prepare for the Stalls portion of the new Private Pilot Practical Test.

**Directions:** From Randle Road, turn East on Algonquin Road (Rt 62), turn North on Pyott Road, turn left at airport sign, building on right.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
