

DuPage FSDO FAAS Team presents:

# Enhanced Vision Systems

## Event Details

**Sat, Jan 20, 2018 - 10:00 CST**  
**EAA Chapter 104 Meeting Room**  
4207 Murvihill Rd  
Valparaiso, IN 46383

Contact: **JANICE MARIE WELSH**  
(219) 448-9536  
[jwelshcfi@yahoo.com](mailto:jwelshcfi@yahoo.com)

Select #: GL0380024  
Representative JANICE MARIE WELSH

**Background:** The GAJSC has determined that a significant number of general aviation fatalities could be avoided if pilots were better oriented with respect to their operational environments. Weather, night, smoke and other obstructions to vision can compromise safety, especially when operating close to the ground. Enhanced and Synthetic Vision Technology – now available for installation in general aviation aircraft – could lower the number of reduced visibility accidents.

**Teaching Points:**

- Discuss the scope and safety benefits of enhanced vision technology.
- Acquaint pilots with available resources.
- Encourage pilots to adopt and maintain proficiency in the use of the technology.

**Directions:** Fly or drive to Porter Regional Airport  
Meet at the EAA Chapter 104 meeting road in white building along Murvihill Rd adjacent to Civil Air Patrol building and opposite side of building from Region Flyers flight school

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
