

Thunderstorm Avoidance

Thunderstorms can produce extreme turbulence, intense rain, destructive hail, blinding lightning, tornados, and gusty winds...sometimes as far as 20 miles from the storm. The good news is...they can be avoided. We'll discuss strategies and practical experience to develop tools you can put in your airman toolbox to help you make safe aeronautical decisions in regards to flying and thunderstorms.

Directions: Whiteside County Airport Main Terminal Conference/Meeting Room

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
