

Fly by Night

Fly By Night

Especially in light aircraft, flying after dark comes with real trade-offs. Smooth air, better performance, and stunning views are great—but they're offset by trickier landings, invisible terrain, and limited emergency options. So what's the key to staying safe after sundown?

This seminar looks at night flying from a risk management perspective. Using decades of accident data, we identify common problems and recommend the best ways to avoid them. Along the way, we cover::Requirements for pilots and aircraft Unique flight planning considerations Why all nights are not created equal Things that can take you by surprise

Directions: Main Terminal Building Landside Lobby Area

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
