

Stabilized Approach and Go-Around

Unstable approaches and the reluctance of many pilots to go-around when an approach becomes unstable are precursors to many general aviation accidents. Emphasizing stable approaches and making the decision to go-around are key to reducing landing accidents.

Directions: The EAA clubhouse shares a building with REGION FLYERS on the south side of the field. Those driving in will find parking around the building. Those flying in may park on the ramp to the north of the building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
