

## Know your aircraft

Every driver learns (or should learn) how to change a tire and every car comes with a spare tire, but what about your airplane? This seminar will show you how to build up and change an aircraft tire. It will also show how aircraft brakes work, what to look for, and how to complete a brake job on an aircraft.

**Directions:** Northwest corner of airport, end of taxiway E, first building on the right from Western end of Tower Road

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Join us on Facebook: <https://www.facebook.com/groups/GASafety/>

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
