

## Preflight After Maintenance

In the seminar, "Preflight After Maintenance," we will discuss the importance of thorough preflight inspections of aircraft that have just been returned to service. The discussion will include the consequences of inadequate preflight inspections, some common problems that have led to accidents, and what to look for following maintenance.

**Directions:** For those flying in, park on the ramp in front of the administration building. Those driving to the event may park in the lot to the west of the administration building, located on the northwest side of the field.
