

Greater Chicago FAASTeam presents:

# **Coping With Interruptions and Distractions**

Distractions and interruptions are causal factors in nearly 25% of motor vehicle accidents in the United States. Distractions and interruptions can severely compromise flight safety as well, especially if they occur during critical phases of flight. General aviation pilots are particularly at risk because they usually do not have additional flight crew members to assist them.

We will discuss the importance of managing passenger expectations, using a checklist and the proper use of autopilots as means to effectively cope with interruptions and distractions.

**Directions:** The event will be held in the airport terminal building. If driving, park adjacent to the terminal. If flying, park on the ramp in front of the terminal.
