

FAASTeam presents:

Secrets to Prepare for and Pass the New FAA/ACS Private Pilot Checkride

Join us for Part 1 of this FAA Safety Team Award Winning Seminar. This will be an entertaining and educational demonstration of a mock check-ride using a local CFI as the applicant.

You will have the opportunity to review various parts of the ground portion and find ways to improve your (or your applicant's) response. We will be using the new Private Pilot Airman Certification Standards (ACS) issued in June, 2019. However, elements of this test will apply to all practical tests.

There will be a demonstration of the greatly expanded risk management language and scenario testing now applied to this test. We will give you insight into how things sometimes go wrong and how to prevent these problems. You and your applicants will benefit from firsthand knowledge of what the Designated Pilot Examiners are thinking when using their plans of action. There will be many useful tips to create a positive, comfortable test environment for you and your students.

Representatives of the FAA Safety Team will be on hand to offer their input and answer your questions, as well. The intent is to conduct a forum with a no-holds-barred, open discussion of questions you may have.

Vacancies are limited. Same day registration is
