Flooded in the Air will – in an IMC Club format – address what might happen next after a twin-engine Beech 18S (Twin Beech) equipped with nearly the original steam gauge cockpit and two VORs flies through areas of heavy precipitation. As the big twin approaches its destination – Baltimore International Airport – a significant amount of water begins leaking through the windshield and soaks all the instruments. Electronic gear begins failing. It will be your job to figure out what to do next.

**Speaker:** Dave Klopffleisch

Following the IMC Club, through the Wings Program and the FAA, Dave will be awarded The Wright Brothers Master Pilot Award. We would like to invite all attendees to participate and congratulate Dave on this incredible accomplishment.

Dave started flying in 1966 at Roselle Airport, now called Schaumburg Airport in Schaumburg, IL. He served in the Navy 1968-1974 with his last duty station at Miramar, CA. In the Navy, Dave flew the TA-4, single engine attack jet.
