

Chicago Midway International Airport Safety Meeting

The purpose of this RSAT meeting is to discuss current operations with the individuals and organizations that are actively involved in air traffic operations and movement of aircraft, vehicles and equipment on the Airport Operations Area (AOA). We look for participation from all airport stakeholders including fixed base operators, commercial operators, flight schools, industry groups, FAA Safety Team representatives, airport operations and maintenance personnel. Participants are asked to help develop recommendations and solutions to enhance surface safety. Those recommendations serve as the foundation for a site-specific Runway Safety Action Plan.

All Pilots (Student, Sport, Private, Commercial, Recreational, Airline Transport Pilot) are encouraged to attend as well as any user of the airfield. Your input matters to improve the way we do business.
