Poplar Grove IMC and VMC Safety

IFR: LATE HOLD - Pilots in the digital age will tell you that avionics proficiency can erode even faster than an instrument scan. How will you handle a canceled clearance with a last-minute hold when you know at least three different ways to accomplish the task? Can you make the magic box behave in time?

VFR: HAVING A FIELD DAY - Practice is the stuff of prevention when it comes to avoiding bad outcomes in flying, but what happens when that leads to an actual problem?

Members watch 2 short videos scenarios and discuss how they would respond to the given situations. This is an open forum for free ideas and we all learn from shared experience!   All are welcome to join in. With the combined IFR & VFR scenarios' this seminar will be 2 hours long and enhance everyone's education.
