

General Aviation Operations Over Water

Planning and knowledge of over-water pre-flight and in-flight processes and procedures can reduce the frequency of forced water landing and the severity of consequences should a pilot be forced to ditch. Basic survival knowledge and equipment can greatly improve chances of surviving after a ditching, but the most important factor in any emergency situation is an individual's will to survive.

This is a one-hour seminar.

Valparaiso Public Library is located at 103 Jefferson in downtown Valparaiso, between Franklin Street and Michigan Avenue. Angled parking is available directly in front of the main entrance, and additional parking is located in the library parking lot. The seminar will be held in Room A.
