

Navigating the Legal Landscape of Drone Operations

Join us for a comprehensive seminar exploring the dynamic field of Geographic Information Systems (GIS) and related technologies. We begin with an introduction to GIS, highlighting its capabilities and our strategic objectives. Delve into the city's open data portal with a focus on excavation sites and lead service features. Discover resources on the Aurora website, including static maps, Watermain Flushing insights, and an EV charging app, alongside field mobility technologies and drone applications. Gain insights into FAA regulations governing Unmanned Aircraft Systems (UAS), with expert guidance on compliance, safety standards, and future trends.

Whether you are a drone operator, GIS professional, or enthusiast, this seminar offers the knowledge and tools necessary for success in these evolving fields.
