

## Expanding Horizons - Tailwheel Transition

Ongoing training is invaluable to maintaining existing capabilities as a pilot, as well as adding new capabilities. Tailwheel training can provide new piloting challenges and improve airplane handling in other aircraft types.

This seminar explores the challenges of transitioning to tailwheel aircraft and discusses potential resources available to pilots desiring to do so.

This is a one-hour seminar.

Those flying in may park south of the terminal building; linemen will assist with parking aircraft. Those driving in should park in the west lot opposite the terminal building.

The seminar will be held in the south classroom on the second floor of the terminal building.

### A message from the National FAASTeam Manager
