

Owner/Operator - Mechanic Relations

Aircraft owners and pilots rely on certificated aircraft mechanics and inspectors for continued airworthiness of their aircraft. Many owners are unaware of their airworthiness responsibilities.

This seminar introduces the responsibilities and authorities assigned to owners, pilots and mechanics with respect to continued airworthiness and offers suggestions for evaluating maintenance facilities and personnel.

This is a one-hour program.

Those driving in may park off Murvihill Road in front of the clubhouse. Those flying in may park on the east ramp in front of the terminal building.

A message from the National FAASTeam Manager
