**this seminar unless
you want a better understanding
of Alternating Current principles.**

Basic AC Theory & Troubleshooting

The Ohio Aircraft Technician's Society is presenting 4 separate courses designed to increase your knowledge of electrical systems. These courses follow NCATT AET recommendations and guides you towards earning the AET rating. Each course is 2 hours long and addresses the following areas: Basic DC Circuits, Basic AC Circuits, Analog Circuit Components, and Basic Digital Theory.

All courses are eligible towards fulfilling 2 hours of training towards IA renewal.

P.S.

Don't forget our AMT Day Cook-Out at the terminal building at Lunken Airport also on Wednesday May 21 between 11 A.M. and 1 P.M.
