

## IMC Club S Dayton - KMGY FBO

### SCENARIO: Best Forward Speed

Every instrument pilot ends up here sooner or later: You thought there was time to slow down before the go down—and it didn't work out. Now you're behind the eight-ball and above the V-speeds to get stuff out and slow down. Is there a sure way to fix this that's not salvaging an already unstable approach?

**Speaker:** Amy Laymermayer:  
CFII/MEI/Corporate Pilot – career and experiences.
