

Monthly Meeting of the Columbus Chapter EAA IMC Club (Mastering the Art of Instrument Navigation)

Pilots are no doubt familiar with the expression: "The devil is in the details," meaning that some elements of a larger task, if ignored, missed, or dismissed, can lead to problems down the road. Arguably, this expression is manifestly applicable to reviewing, interpreting, and executing an instrument approach plate review for your destination airport, including all of its important details. Josh Fisher, CFII with The Ohio State University Flight Education Department, will present best methods for reviewing approach plates that include how to prepare yourself and your airplane for landing, holding, or going missed.

Directions: Go to <http://www.quest-centers.com/> for a map and/or directions to the Quest Conference Center. (The QCC is southeast of the I-71-Polaris Parkway Exchange). Enter at the Main Entrance, you will be directed to the meeting room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov/
