

# Monthly Meeting of the Columbus Chapter EAA IMC Club (Mastering the Art of Instrument Navigation)

NASA researchers have long recognized that unchecked ice accumulation affects an airplane's lift, airflow, stability, and overall performance. They also acknowledge that flight crews, and especially GA pilots, may not fully understand the implications of flying in icing conditions. This presentation will focus on how general aviation IFR and VFR pilots can acquire, analyze, and evaluate icing sources before and during flight. Emphasis will be placed on the importance of taking off with a clean aircraft, the hazards of in-flight icing, and how to quickly detect and exit icing conditions. The goal is to help pilots make good decisions.

**Directions:** Go to <http://www.quest-centers.com/> for a map and/or directions to the Quest Conference Center. (The QCC is southeast of the I-71-Polaris Parkway Exchange). Enter at the Main Entrance, you will be directed to the meeting room.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

Wed, Feb 28, 2018 - 19:00 EST

Quest Conference Center

8405 Pulsar Place, Columbus, OH  
Columbus, OH 43240
