

Emergency Procedures Training / Revised Event Discription

Two local Designated Pilot Examiners (DPE's) will discuss emergency procedures training associated with single and twin engine aircraft. Come out and get informed.

The GAJSC has identified a number of fatal general aviation accidents that occurred following power plant failure. Mismanagement of light twin-engine airplanes in single-engine operations was of particular concern. The GAJSC feels that Scenario-based Training in Emergency Procedures will be effective in reducing these kinds of mishaps.

Directions: Lane Aviation is located on the right side as you drive toward the terminal on International Gateway. Turn right into Lane Aviation entrance, bear to right of flag pole, enter building with maroon awning (4387) over the door, walk up the stairs to second floor, room on the left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
