

Monthly meeting of Columbus EAA IMC Club Mastering the Art of Instrument Navigation

Last month's discussion focused on FAR 91.185(c) (Lost Comm) that included an arrival to the destination well ahead of the ETA. During this month's meeting, we extend that NORDO discussion by introducing into the scenario an Off-Route Obstruction Clearance Altitude (OROCA) component during a long cross country flight transitioning large metropolitan areas in IMC conditions. Discussion will center on locating and using all pilot-available pre- and in-flight electronic flight bag (EFB) tools to occasion a safe flight and compliance with 91.185 and 91.177.

Directions: Go to <http://www.quest-centers.com/> for a map and/or directions to the Quest Conference Center. (The QCC is southeast of the I-71-Polaris Parkway Exchange). Enter at the Main Entrance, you will be directed to the meeting room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
