

Columbus FAAS Team presents:

Topic of the Month - Aircraft Performance and Performance Monitoring

Regardless of how they monitor performance, pilots continue to hold unreasonable expectations for their aircraft and themselves. Reasonable performance expectations based on realistic data result in safer flight operations.

Teaching Points:

Discuss the hazards associated with unreasonable performance expectations
Discuss the safety benefits of Flight Data Monitoring (FDM).

Acquaint pilots with the availability of FDM hardware and software. Encourage pilots to adopt FDM processes

Directions: Lane Aviation is located on the right side as you drive toward the terminal on International Gateway. Turn right into Lane Aviation entrance, bear to right of flag pole, enter building with maroon awning (4387) over the door, walk up the stairs to second floor, room on the left.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Join us on Facebook: <https://www.facebook.com/groups/GASafety/>

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
