

Monthly meeting of Columbus EAA IMC Club Mastering the Art of Instrument Navigation

The “Swiss Cheese” model of accident/incident causation illustrates that despite barriers, weaknesses and systemic flaws in those existing defenses (tumblers) may align under just the right conditions to set the occasion for an undesirable outcome. After viewing a scenario-based, animated video where holes in both ATC and pilot barriers aligned, an interactive discussion will follow on possible preflight, en route, and approach remedies to address future situations.

Directions: Go to <http://www.quest-centers.com/> for a map and/or directions to the Quest Conference Center. (The QCC is southeast of the I-71-Polaris Parkway Exchange). Enter at the Main Entrance, you will be directed to the meeting room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
