

FAASTeam presents:

CFI/DPE Forum-Teaching Safety Risk Management

Aeronautical Decision Making, Safety Management System, Threat and Error Management, Cockpit and Crew Resource Management, Safety Risk Management. We've developed a lot of acronyms over the years that describe the process of detecting hazards, assessing the risk that hazards will compromise safety of flight, and eliminating or mitigating those risks to acceptable levels.

Whatever you choose to call it; a systematic process for defining what you're getting into and deciding how to deal with it is essential to safe flight operations.

We're going to talk about how and when we teach Safety Risk Management to our students and we'll share some SRM education best practices along the way.

Directions: Arrive at the gatehouse and ring the call button. Pull in to the right and park near the maroon awning. Go in the door under the awning and take the stairs to the second floor. The meeting room is at the top of the stairs to the right.

Event Details

Thu, Jul 1, 2021 - 19:00 EST

Lane Aviation

4389 International Gateway

Columbus, OH 43219
