

Service Difficulty Reports - aka Malfunction and Defect Reports and How to Use Them

Service Difficulty Reports are a means of sharing failures, malfunctions and defects on aeronautical products and then this information is publicly available in faa.gov. We will discuss Service Difficulty Reports and how they are managed and able to be referenced for troubleshooting and other uses for this vital information. This information is crucial to creating safety programs and gives the data required for Airworthiness Directives and other Safety Solutions.

Directions: Please go to the Ballou Skies hangar for the seminar.

A message from the National FAASTeam Manager
