

Best Glide Speed and Distance

Hopefully, you will never need to use it in an emergency situation, but knowing the best glide speed and how far you can fly could very well save your life if it suddenly becomes very quiet up there. Stop by for a discussion and some friendly advice from someone who "rode one all the way to the corn below" and lived to tell the tale.

Directions: Meeting will be held in the Airport Administration Building.

Fly in aircraft should request to park on the north side of the airport, west of the tower.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
