

## Emergency Procedures Training

The GAJSC has identified a number of fatal general aviation accidents that occurred following an engine failure. Mismanagement of light twin-engine airplanes with one engine disabled was of great concern. The GAJSC believes that scenario-based training in emergency procedures will be effective in reducing these type of mishaps.

We will cover the safety benefits of emergency procedures training, emphasizing scenario-based training. The GAJSC committee hopes that scenario-based training will become more widely accepted by demonstrating the benefits of this technique.

**Directions:** Those flying in should park on the ramp to the east of the Terminal Building. The event will be held in the lobby of the Terminal Building. For those driving to the event, the Dr. Haines Airport is three miles northeast of town on M-60.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
