

## Garmin 430/530 Refresher Class

This class is designed to help people move beyond simply going Direct. There are features that can really lower the workload, if the pilot knows how to use them. The interface on these navigators is infamously cryptic. Typically, If you need to do something with the box and you haven't practiced it on the ground, you aren't going to figure it out in the air.

We will try to cover Flight Plans (including modifying an active flight plan in flight), Holding Patterns, Loading and Activating Instrument Procedures, and other questions as they arise.

**Directions:** Park in the front of the building just off of College Circle Drive. Please use the metered spots (metered parking is not enforced on weekends).

Meeting will be held in Room C124

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

Sat, Jan 6, 2018 - 10:00 EST

**WMU College of Engineering and  
Applied Sciences**

4601 Campus Drive  
Kalamazoo, MI 49008
