

Garmin 430/530 Refresher Class

This class is designed to help people move beyond simply going Direct. There are features that can really lower the workload, if the pilot knows how to use them. The interface on these navigators is infamously cryptic. Typically, If you need to do something with the box and you haven't practiced it on the ground, you aren't going to figure it out in the air.

We will try to cover Flight Plans (including modifying an active flight plan in flight), Holding Patterns, Loading and Activating Instrument Procedures, and other questions as they arise.

Directions: Meeting will be held at the Indiana Flight Center facility, Hangar 28, on the south side of the Elkhart Airport.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
