

VMC Club Monthly Meeting

You're on your way home after a great weekend of grass field flying but have been dodging showery precipitation all the way. One last area to bypass and your home. The catch is the only VFR you can use is the peninsula on the west side of Tampa's Class B, about 15 miles ahead. You would stop and wait, but the only good airport is behind you and still IFR in showers. You circle to consider your options: VFR under the Bravo, VFR with a clearance through the Bravo, land without permission at a private airpark where no one seems to be monitoring the radio, or continue to circle, burning gas and hoping things improve.

Meeting will be in the Riverview Airport Office.

A message from the National FAASTeam Manager
