

VMC Club Monthly Meeting

You're in cruise above a marine layer when ATC relays that your FBO found a fuel cap on the ramp—and it may be one of yours. The gauges show half on one side, a bit less on the other. Do you continue VFR? Turn around? Or declare an emergency and descend through the clouds without an Instrument Rating?

Meeting will be in the Riverview Airport Office.

A message from the National FAASTeam Manager
