## Training Classes

### Premier Aviation is proud to announce our pilot training program!

At Premier Aviation, we feel that most shops don't offer the proper training for the use of new equipment. ***Sometimes the lowest price is not as important as high quality and proper training!*** This is why we offer training classes like this to help pilots keep current with the latest Avionics innovations!

Brian Paugh, of Premier Aviation, is the Regions FAA/WINGS approved Avionics Instructor. Courses offered by Premier Aviation can be used as time for a Pilots' WINGS program time.

The courses will cover products you may be interested in or already own, but would like to know more about them. These classes are offered at no charge to you and are being put on to make the General Aviation community aware of new products on the market and how to use the products you already own.

**We currently have a training class scheduled for the Garmin GNS430/530 system operation. This class will be held at the Griffith Airport, IN FBO/Main Terminal Building on Saturday December 5th, 2009. The airport identifier is 05C. We will show basic to intermediate operation of the system. If you are interested in attending, please [register](#). Seating is limited, so make sure to register. We will be providing a free dinner with this class, so registration allows us to determine food and seating requirements for the class.**

You may also register for information to be sent to you by email by clicking on this link: [Registration](#).

We publish our own Newsletter, [The Premier Pilot's Newsletter](#), which includes important information a pilot should know. Some of these items in the Newsletter are; service bulletins, specials, recall information and future training class information. If you would care to receive our Newsletters, just click on this link: [The Premier Pilot's Newsletter](#) and fill out our Registration form.

If you would be interested in having a training class at your airport, contact us at the number below. You may also contact us through our registration page.

If you are interested in attending any future classes or would like to just drop us a line, please click here: [Registration](#).
