

U.S. Shot Peening & Blast Cleaning Workshop and Tradeshow

by  **Electronics Inc.**
Education Division

St Louis, MO - USA

with FAA Certified Training Material

The World's Largest Shot Peening Workshop takes place in St Louis this October.

Electronics Inc. (EI) is the pioneer in shot peening training. We've provided workshops and on-site training around the world for nearly two decades.

Every year EI's Education Division conducts the U.S. Shot Peening and Blast Cleaning Workshop - the world's largest training event dedicated to the shot peening process. The workshop offers classes for everyone from entry-level machine operators to experienced process engineers. Professionals in the Aerospace, Automotive and Bio-Medical industries have benefited from EI training programs. Networking is another advantage to the EI workshop - you'll have the opportunity to share work

Get your money's worth...

Electronics Incorporated offers the very best shot peening training. EI is the first training company to receive FAA recognition and has been training shop workers, managers and engineers since 1991. In 2008 EI entered into a partnership with PRI's Nadcap division to help prepare companies for Nadcap audits. (See sidebar)

Our instructors are experts in their fields. They have the credentials to teach you and your employees proper shot peening practices and are qualified to answer your specific questions.

Questions?

Whether you have questions about an upcoming workshop or the need for information about on-site training, don't hesitate to [contact us](#) with any of your shot peening training needs.

*Electronics Incorporated
Education Division,
Partner in Education
with Nadcap.*

The goal of the "Partners in Education" cooperation is; creating synergy, optimizing accreditation resources, providing an effective and efficient service to the aerospace industry.

Thank You!

We appreciate your consideration of attending an EI Shot Peening Workshop.
