

FREE Proficient Pilot Seminar - Aircraft Control

You're invited to bring family and friends out to this free safety seminar where we'll be discussing the important "Aircraft Control" topic by getting back to the basics of "Stick and Rudder" flying! As part of this presentation, we'll be discussing how learning to fly a tailwheel airplane, completing stall/spin awareness training, doing some upset recovery training, and even getting into some aerobatic flying can help refine your stick and rudder skills and help to make you a safer pilot.

Directions: This free safety seminar will be hosted by Sweet Aviation in the main terminal building at the Smith Field Airport in Fort Wayne, Indiana.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
