

Protect Yourself From Illegal Charter Operations

With the FAA stepping up inspections, outreach, and enforcement, now is the time to become educated on the risks of illegal charter operations and learn how to identify them.

As you are aware, charter is about safety, security, convenience, and productivity. The high standards for training, maintenance, and operators required by the FAA, and the devotion to safety of the charter operators themselves, assure you the safest possible flight environment. Please see the attached PDF flyer for registration instructions, time & location.
