

Fly the Aircraft First

NTSB accident data indicates that pilots in high stress situations who become distracted have a tendency to lose control of their aircraft and crash, often with fatal results. This presentation emphasizes maintaining proper perspective and prioritizing keeping the aircraft under positive control to lessen the likelihood of loss of control issues.

FLY THE AIRCRAFT FIRST is the hallmark of an excellent pilot. This goal may be accomplished through training, discipline and leadership.

The event will be held in the Maintenance Hanger to the east of the terminal building.
