

## CFIT and Plan Continuation Bias

Human biases often weigh the value of information according to pre-conceived beliefs. Pilots should be aware of this tendency and commit to operating within established standards, limitations and norms.

Developing personal minimums, periodic performance reviews with a flight instructor and objective in-flight assessments help to ensure that flight operations are conducted safely and lessen the chance of CFIT accidents.

This will be a 90-minute seminar.

Those driving may park in the west parking lot. Those flying may park their aircraft on the east ramp.
