

## CFIT and Normalization of Deviation Bias

Human biases often weigh the value of information according to pre-conceived beliefs. Pilots should be aware of this tendency and commit to operating within established standards, limitations and norms.

Developing personal minimums, periodic performance reviews with a flight instructor and objective in-flight assessments help to ensure that flight operations are conducted safely and lessen the chance of CFIT accidents.

This will be a 90-minute seminar.

Those flying in should contact South Bend Ground Control and request to taxi to Corporate Wings. Park in the ramp area. Those driving in may park in the enclosed parking garage at Corporate Wings.
