

A Call to Action 2025 Pilot Deviations

Pilot Deviations stemming from inadequate preflight planning and communication misunderstanding can result in airborne and ground accidents and incidents. Thorough preflight planning and adherence to communication protocols can significantly reduce Pilot Deviation hazards and the severity of their consequences. Seminar participants will take a group course on pilot deviations . This is a National requirement following the fatal event near D.C. along with near-miss events.

Parking is available in front of the Terminal. Those flying in may park on ramp. Presentation will be from 7PM to 9PM EST.

A message from the National FAASTeam Manager
