

Behind the Forecast - How Aviation TAFs Are Built

Join National Weather Service meteorologist Joseph Nield and local CFII Wes Olin for a practical and interactive aviation weather seminar focused on how TAFs are actually built. This seminar is intended for pilots at any level looking to learn more about aviation weather forecasting. This session will include discussion, questions, and real-world forecasting insight. This will be a relaxed environment focused on learning, networking, and improving practical understanding of aviation weather. Light refreshments and pizza will be available before the presentation begins.

Hosted at the Westfield YMCA classroom facilities. Enter through the front door, signage will be posted.

This will be a 1.5 hour seminar.

A message from the National FAASTeam Manager
