

Hindsight Bias and CFIT

Human biases are patterns of reasoning that weigh the value of information according to pre-conceived beliefs. Hindsight bias is characterized by a feeling that event outcomes are more inevitable and predictable than they actually are.

Upon entering the airport from county road 400N you will see a metal building on your left. Parking is in front of the metal building. Enter the front door of the building. The meeting will be through the first door on your right.
